

Functional programming in the industry ???

Stef Joosten

April 24th, 2010

ORDINA.OPGELOST.

Why?

Joosten, S.M.M., The Use of Functional Programming in Software Development, Ph.D. Thesis, University of Twente, The Netherlands, ISBN 90 90027297, April **1989**.

ORDINA.OPGELOST.

Agenda

1. What has Ordina done with Haskell?
2. An example: the Ampersand project

ORDINA.OPGELOST.

- 2002, ING Postbank, DISKovery project. Enrichment of performance test data.
- 2003, Rabo, PoC CPL: Generation of a performance model from Rational Rose models.
- 2004, Demonstrator voor compliant services voor het B-dossier project (Telematica Instituut)
- 2004: architecture checker for Archimate.
- 2005-2007, Ontwerp van de Bedrijfs-, Informatie-, en Technische architectuur van de IND (architecture prize LAC 2009), prov. Overijssel, Delta-Lloyd, Rabobank.

- Functional Programmers are rare within Ordina
- People know many different languages to be functional (e.g. APL, Scala)
- There have been no requests for Haskell programmers at Ordina's allocation desk
- Several tools have been built in FP:
 - Ampersand
 - Protos
 - Model analyzers
- Way of thinking...

- Functional Programmers are rare within Ordina
- People know many different languages to be functional (e.g. APL, Scala)
- There have been no requests for Haskell programmers at Ordina's allocation desk
- Several tools have been built in FP:
 - Ampersand
 - Protos
 - Model analyzers
- Way of thinking...
- Conclusion: Haskell has little relevance in practice!

- Research at the Open University: theory, tools, training
- Deep impact on Ordina's Public sector
- Low visibility for functional programming

Ampersand

Overheid 3.0

Research: OUNL

System Integrator: Ordina

Client: Immigration

ORDINA.OPGELOST.

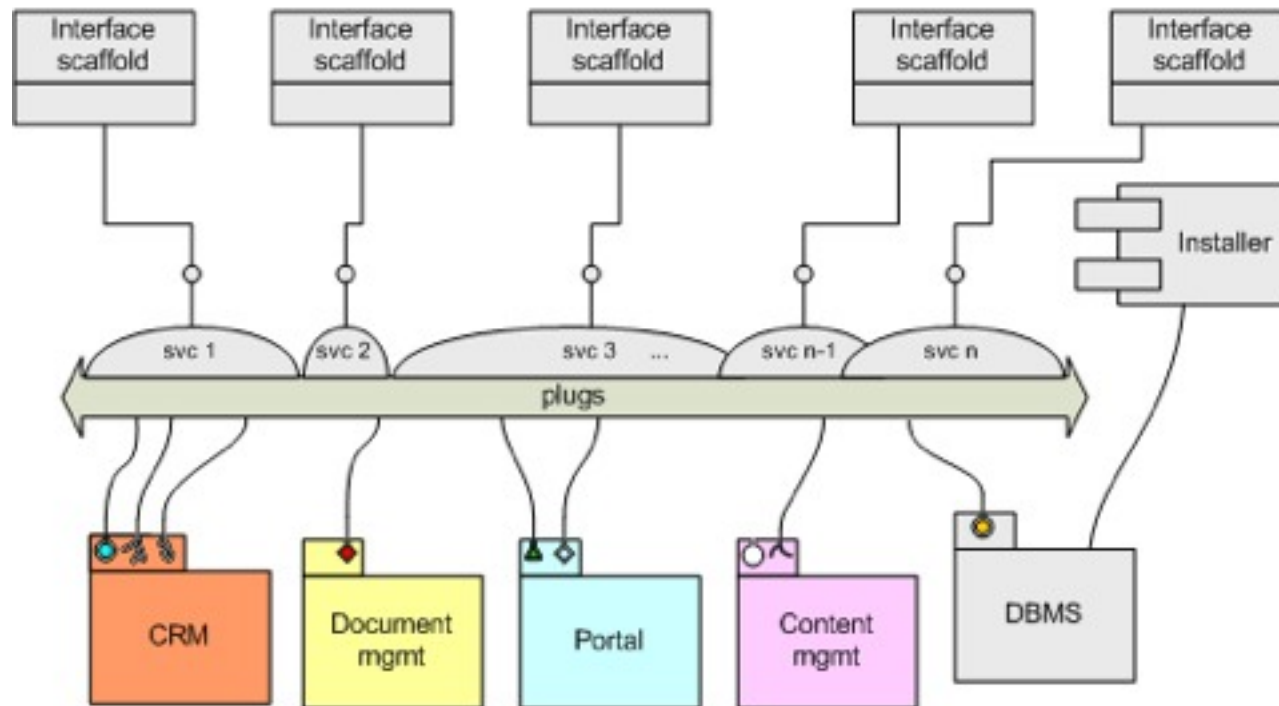

- Functional Requirements must be formal:
Ampersand teaches a formalism to business analysts
- Functional Requirements must be sufficient:
Ampersand generates a functional specification (PDF);
Ampersand generates a functional prototype (MySQL+PHP)
- Functional Requirements must be implemented:
Ampersand guarantees that an implementation satisfies its
functional requirements

So, Ampersand aims at solving the software crisis...

- front

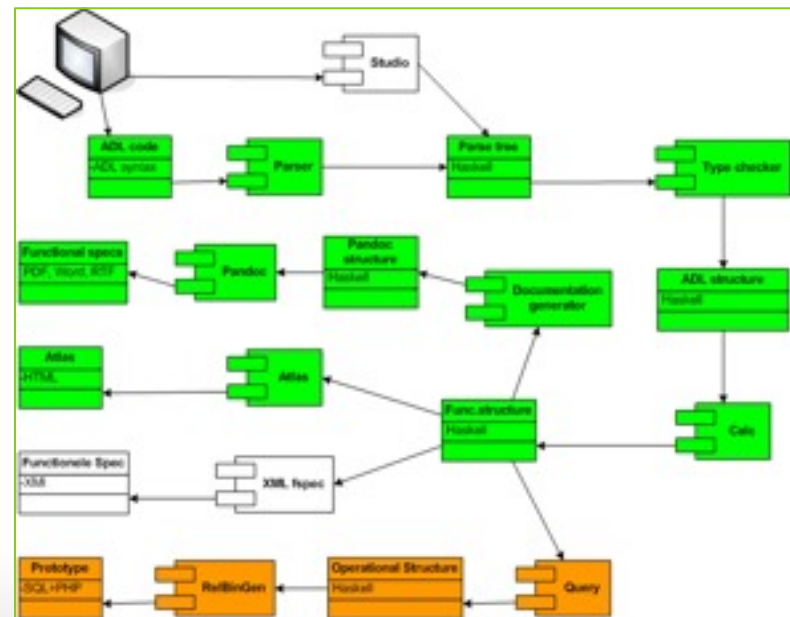

- Service layer

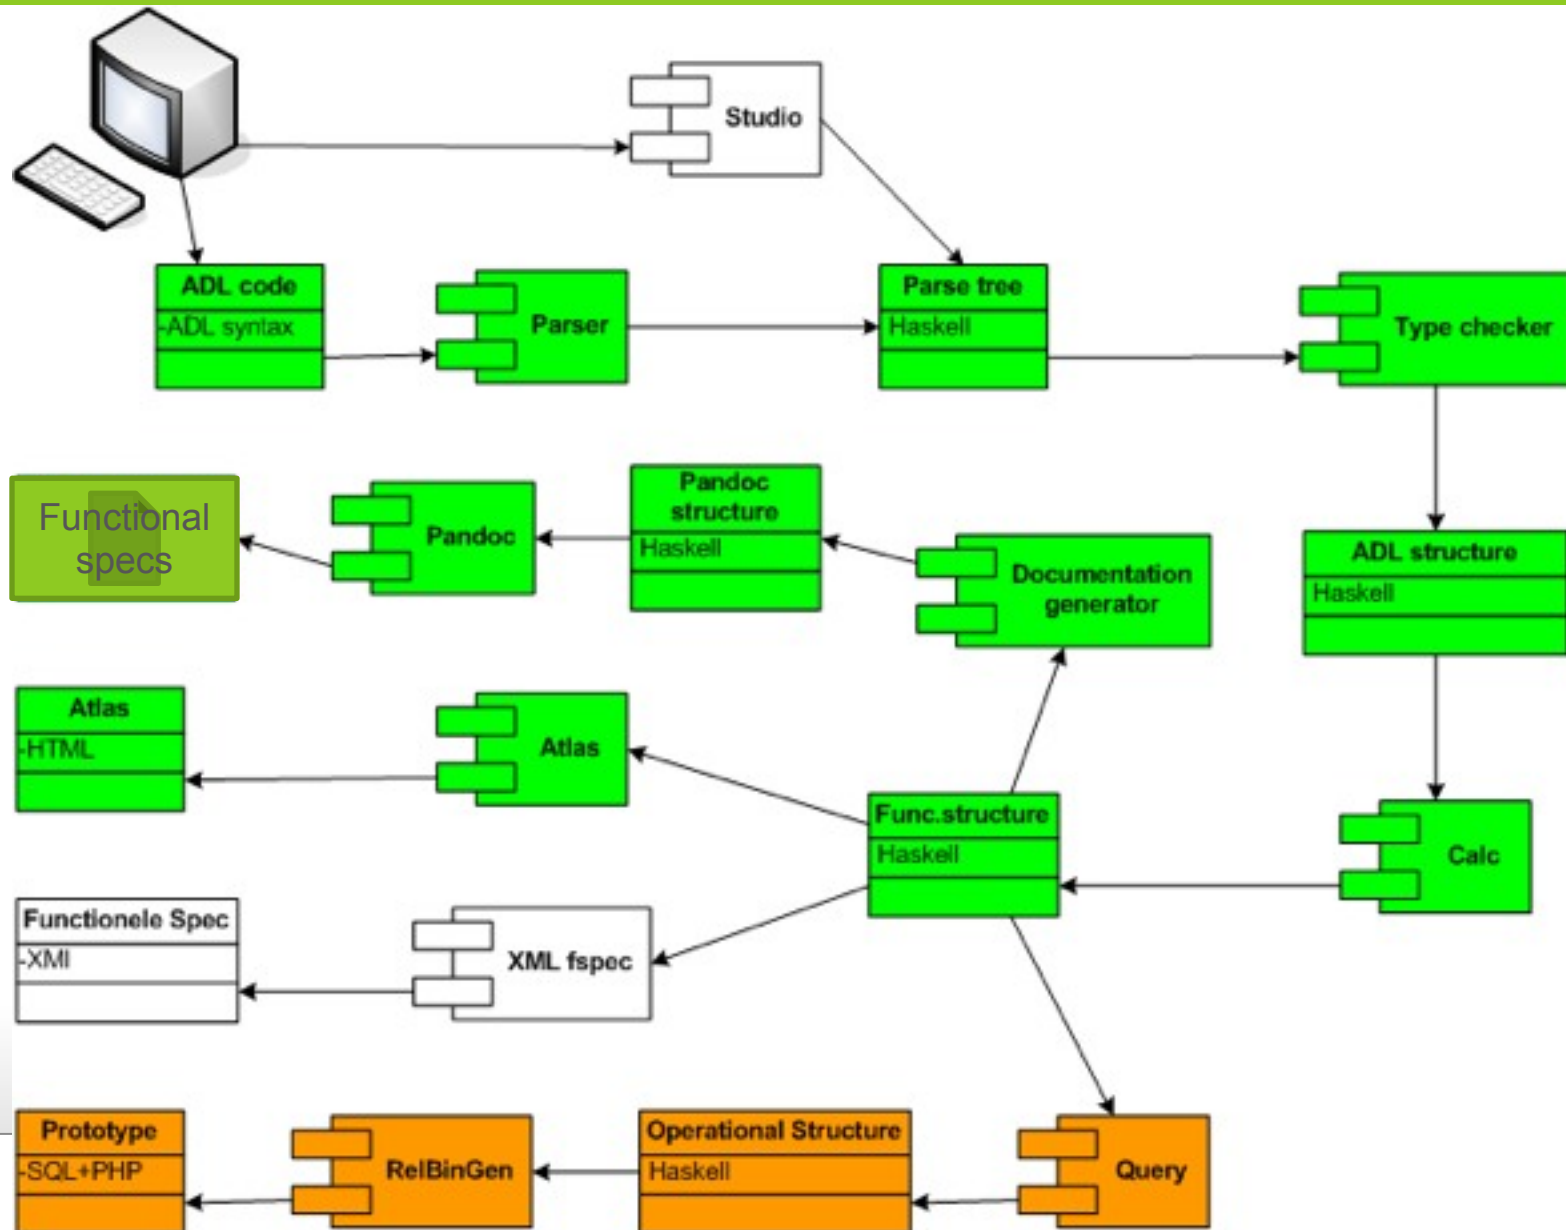

LOST.

- Ampersand's tool set written in Haskell
 - Parser written with Swierstra's combinators
 - Document generation with PanDoc
 - Type checker with AG
 - Graphics with GraphViz
-
